LEUGUR

Figure 6 shows a frame structure for a data stream. The frame is divided into a header section and a data section. The header section contains a frame number (e.g., 600) and a frame length (e.g., 610). The data section contains a sequence of data elements, each consisting of a node number (e.g., 621) and a data value (e.g., 622). The data elements are grouped into a section labeled "APPEARANCE DATA".
